## Project Detail

### Random Quiz Generator

- Purely based on Core Java and Object Oriented Programming. (made on Intelligidea) Here user will be able to take the test and will get the result on the real time.

### Portfolio

- Used HTML, CSS and Javascript. I have linked all the details related to me here.

### Dry fruits Ordering website

- Uses HTML, CSS and Javascript I made this in my 3rd year for future purpose so that people can order kashmiri dry fruits on my website.

### Password Manager

- I have worked on this under a tech organization and I had a team of 3, my contribution was to create the login page and the password resetting lage for the user.
